SECTION SIX | CONSENT

I have been fully informed of the iMOKO™ programme and provided with the information brochure. I understand the information provided and agree to my child receiving the iMOKO™ health checks (which may include swabs as well as photos). I have read and understand the Privacy Statement & Consumer Rights contained in the information brochure. My consent is valid until I withdraw it and I may withdraw my consent at any time by contacting the iMOKO™ team.

Signature Date

## About the iMOKO™ Health Checks

The **iMOKO™** programme was developed in 2013 to increase access to health services for children living in remote communities in the Far North. Coupled with the use of digital technologies, the **iMOKO™** programme is an innovative form of health care.

We are offering free health checks to help prevent the complications caused by untreated health problems. With your consent, trained staff members will use the **iMOKO™** digital equipment to collect health information about any conditions your child may have.

The assessment includes recording some basic health measurements, such as height, weight, temperature and heart rate - all this is done using digital health devices. These measurements are important to ensure the health problem we are assessing is not serious enough to require an urgent assessment by a health professional.

Our staff will gather more information about the health condition your child is presenting with. Often a photo is taken to give the **iMOKO™** telehealth team a better idea of what treatment, if any, is needed.

Swabs are taken if your child has a sore throat. This is a painless and simple test involving a cotton swab sweeping the back of the throat. This is important to determine if the serious infection **Strep Throat** is present.

Swabs are also taken if your child has a weepy and infected looking wound. This is to ensure the most effective treatment can be initiated.

The information collected about your child is entered into a unique file using the **iMOKO™** digital application, which our staff members have on a smart device.

Once all the required information for your child's health condition has been collected, the information is sent through a secure connection to the **iMOKO™** database.

The **iMOKO™ Parent App** is available for download on **Google Play** and **the App Store**. This will give you access to all the information collected about your child. Once you have the **iMOKO™ Parent App** you will receive notifications about any updates to your child's file.

All information is accessible and monitored by the **iMOKO™** telehealth team and used solely for the purpose of assessing and determining an appropriate treatment plan for your child's health care.

A Registered Nurse or Doctor is the only person who can make a decision about treatment for your child. If your child requires treatment, you will be informed by a **iMOKO™** staff member or by notification via the **iMOKO™ Parent App**.

If your child requires treatment, you will be asked from where you would like to collect the treatment - either your local pharmacy or in some cases (depending on your local pharmacist) delivered to your door.

## Frequently Asked Questions

There is no charge for the **iMOKO™ Health Checks**.

**Who will be assessing my child?** A staff member who has been trained and assessed as competent to use the **iMOKO™** technology.

**What if I do not consent to my child being a part of the iMOKO™ programme?** Your child will not be assessed nor registered on the **iMOKO™** database.

**Does my family GP get informed about my child being assessed and treated by the iMOKO™ team?** Yes. Everyone who is assessed by the **iMOKO™** team has an electronic record of this interaction sent to their family GP. This ensures your family GP is involved and aware of the care being delivered to their patients.

**Does this mean I have to register with the iMOKO™ service for my primary health care needs?** No. The **iMOKO™** service does not replace your family GP and primary health care team, who are there to provide you and your family with comprehensive primary health services. The **iMOKO™** service is designed to enhance this care rather than replace it.

**If my child has a dental infection, what happens next?** We will arrange to have your child assessed by a local dental service. Often dental infections occur when dental decay is present.

**Does this cost me anything?** No. This service is free for your child. Costs may only be incurred for other family members. Any person over the age of 13 years is required by our health system to pay a surcharge for medication.

**Are photos taken of sensitive areas?** No. Photos or videos will not be taken of your child if their infection is on an area of the body deemed to be sensitive (e.g. genital and buttocks areas).

**What are the skin conditions covered by the iMOKO™ programme?** The most common conditions are scabies; eczema; school sores; infected wounds and cellulitis.

**Do skin infections spread?** Yes. They spread very easily and are highly contagious if you live in a crowded home.

**How serious are skin infections if not treated?** Untreated skin infections can, in some cases, cause serious complications such as deep bone and joint infections, kidney damage and Rheumatic Fever.

## Privacy Statement & Consumer Rights

We provide this information to help you decide if your child will benefit from the **iMOKO™** programme. Discuss it with your whānau so you feel comfortable about making an informed choice for your child's health care needs.

Your child's privacy is important to us and will be protected at all times. Information will be collected about your child for the purpose of providing health checks and registering your child in the **iMOKO™** programme.

The information collected about your child will include name, age, medical history and information obtained as part of the health checks. This may also include photos of affected areas (except where affected areas are deemed a sensitive part of the body, e.g. genital, buttock areas); swabs; vital signs; and lab results.

The information we collect may come from you, your child, their school or from other healthcare providers (e.g. your family Doctor).

Information is recorded in the **iMOKO™** database, which is managed through a third party service provider and may be stored overseas. The **iMOKO™** database is accessible and monitored by our **iMOKO™** telehealth team only. This means only authorised staff can see your child's information. Refer to our Terms & Conditions at [www.imoko.com](http://www.imoko.com).

In the event your child requires treatment as a result of the **iMOKO™** health checks, you will be notified immediately. Your family Doctor and other health professionals involved in your child's care will also be notified of any treatment your child receives through the programme.

In order to ensure the best and safest care for your child, there may be times when we require additional information from your GP or other healthcare professionals involved in your child's care. Additional information may also be obtained from national databases (e.g. NIR).

From time to time, the **iMOKO™** team may add information to your child's health record and share such information with other health professionals involved in your child's care, as well as the Independent Practitioner Association (IPA). We may also use, and may allow others to use the information we collect for health planning, statistical and educational purposes.

The Health & Disability Commissioner's Code of Rights applies to the **iMOKO™** health checks. For information about your rights visit [www.hdc.org.nz](http://www.hdc.org.nz) or call 0800 555 050.
